

UserDefineException.java

```
1 package UserDefineExceptionHandling;
2
3 class DefineException extends Exception
4 {
5     String sr1;
6     DefineException(String sr2)
7     {
8         sr1 = sr2;
9     }
10    public String toString()
11    {
12        return ("Our result is: " + sr1);
13    }
14 }
15
16 public class UserDefineException {
17
18     public static void main(String args[])
19     {
20         try
21         {
22             throw new DefineException("a user defined Exception");
23         }
24         catch(DefineException exp)
25         {
26             System.out.println("This is inside the catch block");
27             System.out.println(exp);
28         }
29     }
30 }
31 }
32
```
