

UseThread.java

```
1 package ThreadInJava;
2
3 public class UseThread extends Thread {
4
5     public void run()
6     {
7         System.out.println("This is a runnable thread...");
8     }
9
10    public static void main(String args[])
11    {
12        UseThread ust = new UseThread();
13        ust.start();
14    }
15
16 }
17
```
