```java
1 package AbsClass;
2
3 abstract class A
4 {
5     void Method2()
6     {
7         System.out.println("We have a concrete method here.");
8     }
9 }
10
11 class B extends A
12 {
13     void Method1()
14     {
15         System.out.println("This is a method of class A");
16     }
17 }
18
19 public class AbstractDemo {
20
21     public static void main(String args[])
22     {
23         B b = new B();
24         b.Method1();
25         b.Method2();
26     }
27
28 }
29
```
