```java
1 package UseRynnableThreadInterface;
2
3 public class RunnableInterface implements Runnable {
4
5     public static void main(String args[])
6     {
7         RunnableInterface runthread = new RunnableInterface();
8         Thread th = new Thread(runthread);
9         th.start();
10     }
11
12     @Override
13     public void run()
14     {
15         System.out.println("This is a runnable interface...");
16     }
17
18 }
19
```
