```java
1 package StringToCharacter;
2
3 public class Convert {
4
5     public static void main(String args[])
6     {
7         String helloStr = "This is the original String object";
8
9         char[] StrArray;
10
11        StrArray = helloStr.toCharArray();
12
13        System.out.println("The result of the character array is below: ");
14        for(int x=0; x<StrArray.length; x++)
15        {
16            System.out.print(StrArray[x]);
17        }
18
19     }
20
21 }
22
```
