```java
package FinalKeyword;

public class Employee {

    final int Reg_No;
    Employee(int num)
    {
        Reg_No = num;
    }
    void display()
    {
        System.out.println("Employee number is: " + Reg_No);
    }

    public static void main(String args[])
    {
        Employee em = new Employee(201);
        em.display();
    }
}
```
