```java
1 package PrintMatrix;
2 import java.io.*;
3
4 public class MatrixPrinter {
5
6     public static void main(String args[]) throws NumberFormatException, IOException
7     {
8         BufferedReader br = new BufferedReader(new InputStreamReader(System.in));
9         int num1[][] = new int[3][3];
10         int x,y;
11         System.out.println("Please, enter 9 Integer value: ");
12         for(x=0;x<3;x++)
13         {
14             for(y=0;y<3;y++)
15             {
16                 num1[x][y] = Integer.parseInt(br.readLine());
17             }
18         }
19     for(x=0;x<num1.length;x++)
20     {
21         for(y=0;y<3;y++)
22         {
23             System.out.print(" " + num1[x][y]);
24         }
25         System.out.println();
26     }
27 }
28 }
```
